

**Кампус
как пространство развития
междисциплинарных и
кросскультурных коммуникаций**

(кейс)

Вопрос:

Каким образом должно быть обустроено пространство кампуса, чтобы содействовать развитию и САМОразвитию междисциплинарных и кросскультурных коммуникаций?

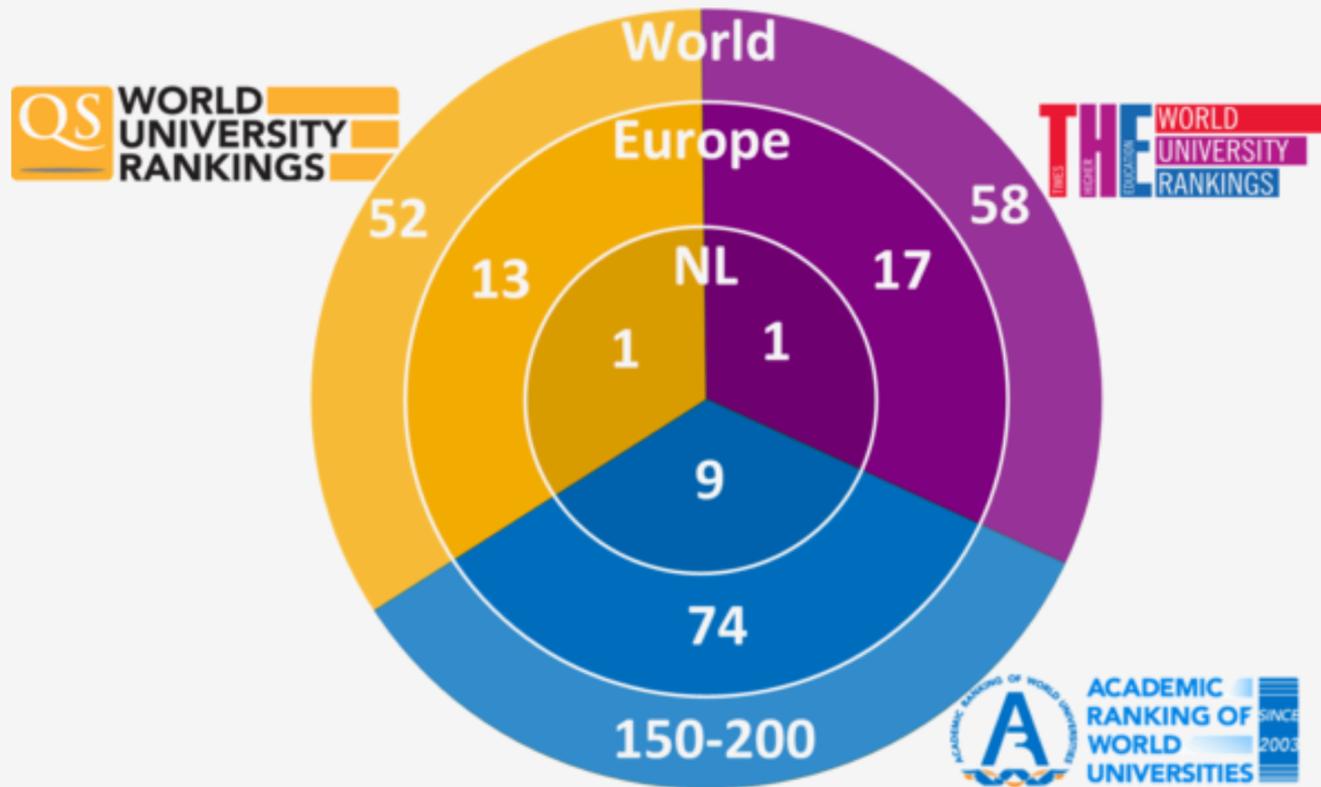

UNIVERSITY OF AMSTERDAM

Кампус Делфтского технологического университета (DTU)

Делфтский технологический университет в мировых рейтингах в 2018г:

Most recent positions TU Delft in World University Rankings

FREE ZONE

B

Freezones are located in the area between O&S (central student administration) and Sports and Culture. They are part of the TU Delft campus objective to create a Living Campus. A place for staff and students with all the (outdoor) facilities that they need within easy reach. The number of Freezones will eventually be expanded.

Plug & Play

Freezones are connected to the electricity-grid of the campus. In order to make use of the facilities (water/electricity) in the Freezone, you need a key. You can pick it up from and return it to the lock desk in the Aula Building after you have made a reservation.

Speak out

Why use a Freezone? For instance you may find it more enjoyable to study or work outside. Or why not try holding a meeting or project presentation outdoors? Do you need an outdoor area to do research? The Freezones come in three different sizes, from small to large. You will always find an area appropriate for what you want to do.

H₂O

Freezones are designated areas on campus with electricity, running water and drainage that are free for you to use between 8:00 and 21:00 for various outdoor activities.

Play by the rules

The Freezones are located in public areas between the buildings where staff and students work and study. There are a number of house rules that you should adhere to. Then send your request to the frontdesk in the aula building (aula-fm-balle@tudelft.nl) and they will look into the options available. Do you want something that the Freezone house rules do not allow, or would you rather organise an activity at an off-Freezone location? Always leave the Freezone and surrounding area clean and undamaged, so don't make and/or leave any holes in the asphalt and the ground surrounding it, and provide your own (extra) trash bins if necessary. Keep the route free for emergency services and stay within the designated Freezone area.

Great! A barbecue is allowed only with a permit. For more information on the application process and other details, please contact the frontdesk. Open fires are not permitted and must stay within the designated Freezone area.

Freezones are available in 3 sizes: small, medium and large. The Freezone B is suitable for 100 people. The size of the surface area of this Freezone is 22 m².

Reservations can be made free of charge at least 3 working days in advance with your NETID using the online reservation system.

Excessive loudness is not permitted. For example, music may not be amplified. In the event of complaints from nearby staff and/or residents, the Freezone will be closed.

A Freezone can be used from 8:00 to 21:00. When making a reservation, be sure to specify the time slot.

Daily, about 27.000 people travel across our campus: students, scientists, visitors, and employees of the university and the companies on campus. Stretching over 101 hectares, the campus is larger than downtown Delft, and one of the largest university campuses in the world.

The campus has been equipped with an extensive bicycle and pedestrian road network. The TU Delft campus has a green, parky character. Large parts of the campus are therefore only accessible on foot, by bike or public transport. For motorists there is the campus ring road, which circles the entire campus. Clear signage on the campus ring guides you easily to the central parking lots. From there, every destination is reachable on foot.

Студенты DTU называют 3 основных фактора развития междисциплинарных и кросскультурных связей в кампусе:

- 1) наличие везде столов и мест для сидения;**
- 2) устойчивый на всей территории WI-FI и возможность подзаряжать девайсы;**
- 1) пицца и кофе на вынос**

За год в DTU выпивают 4,5 млн чашек кофе!
